

1

Step 1: Stamp the Sizzix Framelits set-Snowman using a black stamp pad. Item # 657781 (See images 1 & 2)

2

Step 2: Color Snowman using Copic Markers. Lightly stamp one of the snowflake stamps in the body of the snowman in a very light blue.

3

Step 3: Repeat this technique with the oval tag stamp and die from the same set. You will also stamp the word "Joy" in the center of the tag.

4

Step 4: Align the Framelit on top of your snowman. The blade on the Framelits is on the inner edge so you can easily tell just where your die will cut around your image. To keep the die from shifting, use a piece of removable tape or a post-it note to hold the die in place.

5

Step 5: Use the starry night background from 656984 Starry Night Textured Impressions set to emboss the green card stock. Use a sanding tool to distress the paper and allow the design to stand out more.

6

Step 6: Use the 3" Circle Framelit from the 657551 Circle Set to cut a circle from the front of your note card.

Step 7: Attach the embossed green strip to the spine of your note card and tie the Joy tag to the front of the card. Use foam squares to attach your snowman to the center of your circle opening.

Papers Used for Notecard is We R Memory Keeper's # 61516-3 Christmas Tree from the NEW Peppermint Twist Collection.
