

Embossed Snowman Note card

designed by Christy Anderson

STEP 1: Use a piece of painter's tape to mask off a small portion of the snowman's head. Line up the fold of your note card on the bottom edge of the tape when you cut the snowman out and you will create a snowman shaped card. (See fig. 2-5) Cut a second snowman using the same edge but not folded. This will be layered on top of the note-card snowman after being embossed.

STEP 2: Emboss the single snowman using the coordinating Textured Impressions Embossing Folder that is included with the snowman die. Adhere the embossed snowman to the front of the snowman note card. (See figures 7-8)

STEP 3: Cut the snowman's hat out of black glitter paper. Wrap a festive ribbon around the hat and add a pearl accent. (See figure 9 & 10)

STEP 4: Use Copic Markers to decorate some of the embossed accents on the snowman such as the hearts, mouth nose etc. Use the Copic glitter pens to add sparkle details to the hearts, eyes and mouth. Add a pearl to the center of the snowflake on the snowman's body and you are done! (See figure 10)
